

Feel the breeze

THE POWERFUL, ENERGY-EFFICIENT, AND ENVIRONMENTALLY CONSCIOUS MISTING FAN

The brand

The Skycooler is an adiabatic cooling solution that lowers the temperature by up to **10 degrees** and works by spraying water. Resulting in a cooling effect through evaporation. It is a sustainable and energy-efficient way to provide cooling without the need for air conditioning.

Customize

At Skycooler, we go the extra mile to meet your needs.

We offer customization options, including a variety of colors and wraps, along with marketing applications such as logos.

A large, black, cylindrical misting fan is the central focus, spraying a fine mist of water. The fan has a circular grille on the front and a white circular component in the center. The background shows a crowd of people at an outdoor event, with trees and a white umbrella visible. The overall scene is bright and sunny.
